

### EXTREMELY USER FRIENDLY

Its simple mixing formulae makes Starclass Spectra basecoat easy and quick to prepare, to filter and to apply. It also provides excellent mottling control and blending.

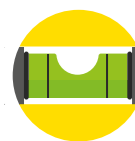

### SUSTAINABLE FOR THE ENVIRONMENT

With the latest in emission lowering solvent technology, you'll improve your working environment, lower emissions and see a reduction in solvent waste, which in turn reduces the health risk to your team.

### EVEN SPREAD OF METTALIC AND PEARL FLAKES

Starclass Spectra Metallic and pearl tones are best in class finishes and the sharpness and spread of the flakes are excellent under sunlight and will be visible immediately after application.

### EXCELLENT LEVELING OF BASECOAT

The self levelling technology of Starclass Spectra ensures the paint levels out evenly over the surface when as it dries, ensuring a smooth finish. No more using air gun to even out bumps and inconsistencies.

### SUITABLE FOR ALL TYPES OF REPAIRS

Starclass Spectra basecoat is versatile – in its range of applications from spot repairs to complete resprays, even in low temperature or high humidity.

# STARCLASS SPECTRA

## THE BEST CHOICE BY FAR

Starclass Spectra basecoat is the latest premium automotive refinish from Asian Paints Causeway. It delivers an extraordinary, high-quality, perfectly colour - matched repair quickly and economically, giving you a more productive overall result.

### BECAUSE PRODUCTIVITY MATTERS

Starclass Spectra Basecoat provides substantial benefits to bodyshops productivity. Each and every feature brings a direct advantage to bodyshops. In the spraybooth, StarClass Spectra basecoat economy in use will reduce product consumption and therefore cost.

Most importantly, quicker application times have a direct impact on throughput; more repaired vehicles make for more revenue.

# SYSTEM HIGHLIGHTS

- Excellent Colour Accuracy
- Two coats wet-on-wet application (with 5 minutes flash off) saves time
- Excellent coverage, lower consumption
- Versatile system for all types of repairs
- Wide application window, handles humidity well
- Comprehensive software for a perfect colour match
- Cost Effective with Multiple shades
- Meets global environmental requirements

# LEADING EDGE GLOBAL TECHNOLOGY

Starclass SPECTRA basecoat exceptional performance lies in a special dispersion technology that promotes better coverage. Starclass Spectra basecoat also boasts excellent colour accuracy when it comes to mixing the paint. It's as close to the OEM finish as it will be the first time making it.

Productivity & quality can be maintained in virtually any climate because Starclass Spectra basecoat can be used in a wide range of ambient temperature and humidity levels. It outperforms other mid-range brands in quality, in application time and in product consumption.

Extensive tests have proven Starclass Spectra Basecoat quality and economy in use.

# ONE PRODUCT MANY BENEFITS

Starclass Spectra, an acrylic based solvent basecoat, is for clear-over-base applications. It provides an exceptional colour match, a productive application process and excellent economy-in-use.

### SYSTEM OVERVIEW

Starclass Spectra is based on 78 mixing bases allowing accurate mixing of approximately 23,000 solid, metallic and pearlescent colours. It has a range of binders and controllers to suit all applications and temperatures.

The system complements our Straclass range of products topcoat technology that gives faster topcoat coverage in fewer coats and a range of productive clearcoats, maximizing productivity capabilities.

### QUICKER PROCESS TIMES

With excellent coverage with two coats wet-on-wet application, Starclass Spectra Basecoat time - savings in application are substantial. It dries quickly so that less time is spent on each job. Overall, delivering unrivalled productivity.

### REDUCED PRODUCT CONSUMPTION

Starclass Spectra Basecoat advanced technology delivers significantly lower material consumption. Coverage with only two coats means the same amount of paint will get more jobs done.

The comprehensive Starclass Spectra System - comprising mixing tints, binders, controllers and a number of other components - enables any type of repair, while providing greater efficiency and easier stock control.

### EXCEPTIONAL COLOUR ACCURACY

A perfect colour match to the original OEM finish is the hallmark of an exceptional repair.

Our state-of-the-art colour retrieval software®, ensures the right formulas are at refinishes fingertips. This guarantees the perfect colour match, every time, for any type of repair.
