You might not have a favourite, choosing instead to embrace all that life’s rich, varied palette has to offer.

Bring relaxation to the table with creamy hues and comforting features.

“Informal dining is as much about the décor as it is about what’s on the table.”

Boost the vibrancy of a neutral space with a green table setting or counter display.

so that your room has balance, give its design features lead and supporting roles. In the display opposite, the wallpaper dominates with its intricate patterns, which are complemented by soft, gentle furnishings. The same idea works just as well the other way around: if your wall favours pastel patterns and hues, that’s your cue to make bolder selections with your furniture and accents.

**PLAY WITH PATTERNS**

Patterned wallpaper makes a room wonderfully unique. Here’s how to style it with stunning impact.

**THE GOLDEN TOUCH**

A sophisticated accent is a natural match for an elegant space. Gold finishes always look good alongside floral prints.

**FLOWER POWER**

A pop of green breaks up the intensity of the room. We like to use flowers, especially if the setting is flooded with sunlight.

**PRINTS CHARMING**

Printed cushions and throws are beautiful ways to rev up existing furnishings and make it fit the patterned scheme.

Walls are your canvas to elevate the features that make a house a home
Harmony emerges from a paint that complements your wall art display.
The best hotel rooms are typically guided by the principle that less is more. In your bedroom at home, that means picking a theme and sticking with it. Once you’ve decided on your paints and wallpapers (in this case we’ve opted for coastal-inspired hues), focus on little things that make the room feel composed and cozy, whether it’s your own or one for overnight guests.

Reading Room
If you have a corner going spare, use it to create a nook for reading in a comfy chair.

Nice Throw
A bed can never have too many layers, especially when they enhance the look of the room.

Pop Stars
If at any point in the decorating process you feel the theme take over, a few brightly coloured accents will make for a pleasing change.

Texture Talk
A mix of textures (soft-touch rugs, well-worn wood, lush leather) add depth and character to your space.

“Close your eyes, picture your dream hotel stay and think about what you loved the most”
The right wall colour helps show off structural features unique to your home.
Colour-blocking gives each area of your home an individual look and feel.

Before and after

A rich, balmy tone can work in harmony with a series of subtle accent pieces.

Alternatively, you can match your furniture tones to a wall painted in a cool hue. This gives the room a certain sense of refined sophistication.
White shades will always be a good fit for a room immersed by daylight.

Darker, fuller tones have their place too, especially for creating a sense of drama.
