TECHNICAL DETAILS

- a. Drying time: Surface dry time 30 min
- b. Sheen levels: NA
- c. Flash point IS101/1987 Part 1, Sec 6: NA d. Stability of thinned paint: To be used within 45 minutes

PRECAUTIONS

- > Do not apply the material without pre wetting the surface for the 1st coat
- > Preferably use a Putty mixer for effective and quick mixing with water
- > Pre wet the surface before application of the 2nd coat of putty
- > Ensure the material is mixed homogeneously with water and allowed to stand for 5-10 mins before application
- > Do not sand the material vigorously with Emery Paper otherwise it will reduce the strength of the material
- > Do not apply the material to fill cracks
 - Though the material is non-toxic, care should be taken to avoid dust inhalation while mixing and handling
