APL/CDL/TNPCB/59/2025-26

30th September 2025

To

The District Environmental Engineer,
Tamil Nadu Pollution Control Board,
A-3, SIPCOT Industrial Complex,
Near SIPCOT Fire Station,
CUDDALORE – 607 005.

Dear Sir/Madam,

SUB: SUBMISSION OF FORM V ENVIRONMENTAL STATEMENT FY 24-25

With reference to the above-mentioned subject, we are enclosing here with Environmental statement – Form V for the FY 24-25 of our Captive Power Plant, Asian Paints Limited, Cuddalore.

This is for your kind information

Thanking you,

Yours faithfully,

for **ASIAN PAINTS LIMITED.**

SARAVANAN S
MANAGER – QA & EHS

Encl: As above

FORM V – CAPTIVE POWER PLANT

Environment Statement for the Financial Year ending 31st March 2025

PART A

(i) Name and Address of the owner/occupier of the industry operation or process	Shri. Amit Syngle Managing Director and CEO Asian Paints Limited Captive Power Plant B5 - B10 Sipcot Industrial Complex Cuddalore 607005
(ii) Industry category Primary – (STC Code) Secondary – (SIC Code)	17 category – Thermal power plant
(iii) Production capacity	Consented Quantity Steam - 30 MT/ Hour Power - 1.9 MW
(iv) Year of Establishment	1986
(v) Date of last environmental statement submitted	29.06.2024

PART – B

	During the previous (2023-2024) financial year (KL)	During the previous (2024-2025) financial year (KL)
Water and Raw Material Consumption		
(i) Water consumption m ³ /day	61.32	27.6
Process m ³ /day	61.32	26.6
Cooling water m ³ /day	-	-
Domestic m ³ /day	1	1

Name of Products	Process water consumption per unit of product output	
	During the previous (2023-2024) financial year (KL)	During the current (2024- 2025) financial year (KL)
Steam	16	16
Power	0	0

Note – Penta plant condensate water is reused in boiler for steam production. Hence fresh water and condensate water from Penta plant is the input for steam production.

(ii) Raw material consumption

Name of Raw Materials	Name of Products	Consumption of raw material per unit of output (Tons/Ton)	
		During the previous (2023-2024) financial year	During the current (2024-2025) financial year
Coal Biomass	Power	4.66	0.21 0.00011

Pollution discharged to environment/unit of output**a) Water pollutants - Trade effluent & Sewage effluent**

Parameter	Quality of Pollutants discharged Kg/day	Concentrations of pollutants discharged (Mass/volume) Mg/L	Percentage of variation from prescribed standards with reasons
A. Water	Not applicable. Effluent from captive power plant is treated in Main plant (Penta plant) ETP		NIL

b) Air pollutants

S.no	Stack	Parameter	Quality of Pollutants discharged Kg/day	Concentrations of pollutants discharged (Mass/volume) Mg/Nm3	Percentage of variation from prescribed standards with reasons
1	Boiler 16 – TPH	Particulate matter SOx NOx	20.16 20.43 101.6	34.02 34.53 197.17	Within specified limit
2	Boiler 14 – TPH	Particulate matter SOx NOx	Not in use		
3	Coal crusher	Particulate matter SOx NOx	2.19 0 0	13.2 0 0	Within specified limit

PART – D
Hazardous waste

Hazardous Wastes	Total Quantity in MT	
	During the previous (2023-2024) financial year	During the current (2024-2025) financial year
(a) From Process	NIL	NIL
(b) From pollution control facilities	NIL	NIL

PART – E
Solid Waste

Solid Wastes	Total Quantity in MT	
	During the previous (2023-2024) financial year	During the current (2024-2025) financial year
(a) From Process Ash from boiler	1479	1747
(b) From pollution control facilities	NIL	NIL
(c)(1) Quantity recycled or re-utilized within the unit	NIL	NIL
(2) Sold	NIL	NIL
(3) Disposed	1315	2048.05

PART – F

Please specify the characteristics (in terms of consumption of quantum) of hazardous as well as solid wastes and indicate disposal practice adopted for both these categories of wastes.

There is no any Hazardous waste generation in the Plant. Required Maintenance activity support is carried out by Penta plant. Penta plant has separate Hazardous waste authorisation for disposing hazardous waste.

PART – G

Impact of the pollution abatement measures taken on conservation of natural resources and on the cost of production

- Screw press and filter press installed for handling the sludge disposal

- RO membrane replaced for increasing the permeate water recovery

The following activities were celebrated in the last year to improve awareness and participation

- Mission life directions were encouraged and propagated by distribution to employees.
- Seed from household are collected and made to saplings
- Models of roof water collection is made and presented in factory.
- World environmental day celebrated Drawing competition, Quiz, Essay competitions was conducted, and prizes were distributed.
- Effluent treatment plant infrastructure is improved by providing screw press and filter press for dewatering from sludge.
- ECO club activities are conducted every month and implementing green initiatives around the factory
- 2063 Trees saplings were planted in our factory premise (comprising of penta & CPP) for the FY 2024-2025.
- The effluent generation is being periodically monitored on the shift-wise basis and appropriate action is taken to reduce the effluent generation from source itself.
- The effluent treatment plant is being operated as per the established operating procedure, and the performance is being monitored closely to ensure consistent COD & BOD reduction across aeration system
- The sewage treatment plant was successfully operated for achieving the sewage standards and the treated water is used for gardening purpose.
- Recovered water from the zero liquid discharge system is used in our cooling tower.
- Water treatment plant performance is maintained at average output between regeneration of 1250 KL.
- The ambient air and various emission discharge points of boiler stack and process stacks are being monitored at regular intervals by engaging external laboratory and advanced environmental lab, TNPCB. The quality of the emission points are well within TNPCB norms.
- The sludge generated from ETP is being sent to TNPCB authorised recyclers for disposal as and when required.
- Sprinkler systems is used for gardening purpose.
- Solar dryer for drying of Hazardous waste is operational.

AIR EMISSION MONITORING

- We are monitoring the ambient air quality weekly twice at two different locations. (Both up wind and Downwind directions.)
- We have been regularly monitoring boiler stack emission by engaging reputed laboratories / TNPCC's laboratory.
- We are monitoring the Ambient VOC / THC / AAQ, in different locations (Both upwind and down wind direction) once in three months and ensured that the values are well within the limit.
- One online NAAQ monitoring station is available in predominant wind direction in consultation with TNPCC officials to monitor PM_{2.5}, PM₁₀, SO₂ & NO_x and the monitored data are uploaded to CARE AIR CENTRE, TNPCC.
- The recommendations from the audits are implemented on a regular basis.
- TVOC meter is available in the process area and the monitor data is uploaded to CARE AIR CENTRE, TNPCC.
- LDAR is being carried out on a regular basis by which the TVOC emissions were identified and controlled.

Details of activities carried out to maintain the ambient air quality are as follow

- New storage capacity for storage of Acetaldehyde is installed for improving storage condition.
- Online NAAQ monitoring station has been installed and connected with care air system.
- LDAR is being carried out using MoEF approved Laboratory once in a year as per consent requirement and the leaks if any were arrested.
- The Process stacks monitoring is done every quarter.
- Nursery is developed for Rose, Herbal plant and other native tree species.

ENVIRONMENT & SAFETY MANAGEMENT: ISO 14001 & 45001

- We have designed and implemented the Environmental Management System (EMS) as per the international standard ISO 14001 & 45001. This system is being regularly audited every six months by M/s Det Norske Veritas (DNV /GL).
- Our unit is certified for ISO 9001 standards by MS DNVIGL.
- The recommendations from the audits are implemented on a regular basis.

TRAINING OUR EMPLOYEES ON ENVIRONMENTAL ISSUES:

- Regular training programmes are being conducted for employees to educate, train and motivate their activities in an environmental friendly/responsible manner.

- As a part of ongoing ISO 14001 and ISO 45001 activities, we have been conducting job related environmental training programmes for all our employees in various departments for developing/improving their skill levels.
- We are taking lead for spreading awareness on Environmental preservation by campaigning on environmental issues among our employees and neighbouring villagers.
- The Environment Day was celebrated in our factory every year. Detailed speech was given by Environment team to the Employees regarding the importance of maintaining a healthy environment.
- Fly ash is sent to M/s TSK Fly Ash Bricks, India Fly Ash Bricks & Shivam minerals for brick manufacturing.

PART – H

Additional measures/investment proposal for environmental protection including abatement of pollution.

- Rainwater collection and harvesting was done (around 200 cubic meters).
- We are continuing to use Environmentally friendly imported coal originating from Indonesia.
- Methanol transfer line from unloading pump to storage tank was replaced to reduce fugitive emission.
- Breather valve is provided in storage tank
- Consuming coal contains less Sulphur content.
- Lake delisting is done nearby villages around factory.
- Additionally, 63400 KL water holding capacity is generated in desilted lake.

PART – I

Any other particulars for improving the quality of the environment

- We are conducting characterisation of the effluent and recycling the same in the plant for various process applications.
- Solar dryers in sludge drying beds for improving the drying efficiency of the sludge drying beds is performing well.
- 450 Tree saplings planted outside the factory premises.
- The rainwater harvesting trenches in the boiler area was constructed for effective harvesting of rainwater.

- Environmental management cell

Name	Designation	Qualification
Jayakanthan P	Senior Manager - QA & EHS	B. Tech (Chemical) & Diploma in industrial pollution and control
Saravanan S	Manager - QA & EHS	B. Tech (Chemical)
Sakthivel R	Senior Executive - EHS	M.E Environmental Engineering
Durai Selvam	Executive - QA Lab	M.Sc. Chemistry

CSR Activities carried out during FY 24-25	Amount in Rs.
Health & hygiene projects in Cuddalore	Rs. 1,35,25,091
Rejuvenation of water bodies in Cuddalore	
Disaster management	Rs. 55,000
